

# TU Delft Library

## Research Infrastructure

### Operational Plan 2024

This operational plan highlights work done within the Research Infrastructure team at TU Delft Library, in the period from January 2024 to December 2024.

#### Services

| <b>Service name</b><br>(Consult <a href="#">the service list</a> for the names of services) | <b>Description of work</b><br>(Briefly describe plans to maintain, modify or update the service.)  | <b>Responsible Owner</b> |
|---|--|--------------------------|
| TUD Repository  | The purpose of the repository is (a stable, central location that has interoperable data flow/harvestable data): <ul style="list-style-type: none"> <li>to provide access to and enable uploading of trustworthy and inspiring TUD outputs that are findable, help new researchers, and foster collaboration</li> <li>To showcase and contextualize output for outreach</li> </ul>                               | Armand Guicherit         |
| CRIS – Pure   | The purpose of the CRIS is creating a high-quality metadata collection of TU Delft scientific output and sharing that for multiple purposes.<br><br>This year’s focus includes understanding the current usage, creating and updating internal policy, and the following projects: the CRIS Tender project, Pure moving to the Cloud. The innovation this year linked to CRIS is Collect & Review User Feedback. | Armand Guicherit         |
| Pure Portal   | This research portal is the public-facing means (website) of showcasing the expertise of researchers and institutional impact<br><br>This year we focus on internal policy and procedures.   | Armand Guicherit         |
| Development Support as needed   | Developers provide additional support for other Library services, such as Open Publishing as needed through Top Desk requests. Developers are: Andjela, Arent, and Gabriela.   | Naomi Wahls              |

#### Projects

| Project Name                           | What is the goal of the project?   | Project Manager  |
|--|--|------------------|
| TUD Next Generation Repository         | Migrate Data in Q1 2024, Showcase Trends & Collections Q3 2024, Release Phase 1 July 2024 and start Maintenance Phase July 2024. | Ardi Nonhebel    |
| EnergySHR                              | The EnergySHR platform is a platform for sharing datasets and algorithms for research in the transition.                         | Carline Duterloo |
| Pure and Pure research portal Tender   | Review CRIS requirements and provider options to select a provider for 2026 implementation                                       | Armand Guicherit |
| Pure -> Cloud                          | Pure is moving to the cloud and we are reviewing the option to move files from Pure to the Repository.                           | Armand Guicherit |
| Adding projects to Pure and Repository | A new category of content is being piloted this year in Pure and in the Next Generation Repository                               | Armand Guicherit |

## Innovation Ideas

| Area                        | Description  |
|-----------------------------|--|
| TUD Repository New Features | Prepare to include Education and Heritage repositories to combine the 3 repositories into 1. Collect New Feature Requests through Top Desk and process them through Confluence Knowledge Base and Jira for Change Management.  |
| User Feedback & Engagement  | Collect and process user feedback and collaboratively create an engagement plan for users  |
| Matrix Infrastructure       | Align with other Library teams to improve infrastructure of services to match current policy <ul style="list-style-type: none"> <li>Understand Purpose and Intended Usage of Other Library Services (Visible)</li> <li>Understand how their Edit Mode works (Temporarily unavailable)</li> <li>Understand what happens when content Doesn't fit Intended Usage (Hidden)</li> </ul> |

## Other Areas of Work

| Area   | Description   |
|--|---|
| Governance with ICT                            | Explore Partnership through using common language of Information Technology Infrastructure Library (ITIL) Service Value Chain for the Repository, Policy for Research Pilots, Create & Share Reporting for Repository, Improve Governance of CRIS, Collect & Review User Feedback for CRIS and Repository |
| Visibility of Research Services (Research Hub) | Assess current visibility, stakeholder analysis, and strategy of initiatives such as Catalogue of Research Services.<br>Gather User Feedback, Review User Analytics & User Engagement, and Implement 1 <sup>st</sup> phase initiatives  |
